

October 1, 2021

This policy covers all Resolute Forest Products woodlands operations in Ontario, consistent with Resolute's corporate sustainable forest management vision.

Resolute Forest Products is committed to managing our forests in a manner that will secure the long-term viability of our business and enhance shareholder value, while maintaining environmental considerations in our planning and practices. We achieve this by implementing sustainable forest management (SFM) principles, including all Sustainable Forestry Initiative® (SFI®) Forest Management and Fiber Sourcing principles, in our operations through continual improvement, balancing environmental, economic, social and cultural values.

**TO MEET THESE COMMITMENTS WE WILL:**

- ◆ Strive to meet or exceed the requirements of all applicable environmental and social laws and regulations and other requirements subscribed to by Resolute Forest Products, including the prevention of pollution;
- ◆ Enforce our policy not to purchase wood from illegal sources;
- ◆ Develop sustainable forest management plans according to the laws and regulations for Ontario that take into account both timber and non-timber values while ensuring the conservation of biological diversity based on sound scientific principles;
- ◆ Actively engage First Nations Communities with the goal to have positive working relationships;
- ◆ Actively involve forest stakeholders in the development and implementation of forest management plans;
- ◆ Seek local contractors and contractors with local workers;
- ◆ Encourage contractors' non-resident forest workers to reside in local communities while working on the forests, whenever practical;
- ◆ Encourage procurement of local goods and services;
- ◆ Require appropriate training for company employees and contractors working in our forest operations and producing wood fiber for our mills;
- ◆ Support research and development that advances the understanding of forest science, management practices, climate change and sustainable forest management;
- ◆ Endeavour to incorporate forest certification best management practices during all phases of forest management activities, including:
  - ◆ Prompt reforestation
  - ◆ Protection of special sites
  - ◆ Protection of wildlife habitat
  - ◆ Efficient use of forest resources
  - ◆ Maintenance of forest and soil productivity
  - ◆ Protection of water quality, water bodies and riparian zones
  - ◆ Visual quality management
  - ◆ Recreation
- ◆ Monitor, measure and periodically assess our performance through publicly available, third party processes of auditing and management review to ensure continual improvement in our operations;
- ◆ Promote the use of forest certification best management practices among our external fiber suppliers, including private woodlot owners.
